ABSTRACT

Ideas:

Website oriented to instructors: 1-Can be used for retrieving documents for the students from the school database, or from google itself 2-Analysing text or exercises that are for students to see if the readability level is the adequate.

Website for students: 1- Follow the readability of a student during its learning process 2- Personalize the search results for himself, using google query, surf the internet making sure the texts are adequate to his level 3- Personalize the reading material to find encouraging books from school library. Some students need lower or higher level books, compared to the class. 4- A student can determine the quality of an essay written himself, analysing it with the web application.
